STARLING LOUNGE CHAIR

by cameron foggo

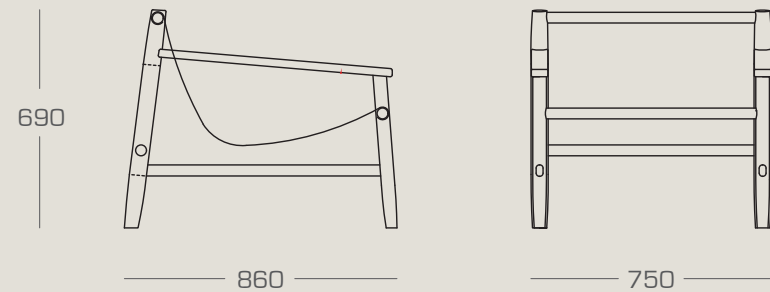

This iconic sling chair was originally designed by Cameron Foggo in 2008 but went out of production due to technical difficulties. One of the challenges was finding leather hides of sufficient size, quality and durability that could be suspended from front to back rail and bear the load through frequent use. Cometh the hour, cometh the solution from Sorensen of Denmark. Harness leather, sturdy and beautiful, tanned by European artisans; often used by equestrians for saddlebags and harnesses, now applied by furniture lovers to create something sleek yet strong, raw yet elegant, expressing its character through brutal simplicity.
